REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior fails to disclose, in combination with all the base limitations, providing a torque computation unit of a vehicle generator, which uses a field current, output current and rotation speed for calculating a torque and further using a voltage applied to the field coil and an on-off ratio of the field current switch, and further using a solenoid around the armature winding and detecting the output current value from the voltage applied to the solenoid and using a C-shaped magnetic core slit and magnetic sensor being inserted into the slit and the torque calculation means calculates the inertial torque of the generator from the acceleration velocity and moment of inertia of the rotor. Moreover, the prior art fails to disclose the torque calculation formula disclosed in claim 11, which uses mutual inductance between a field coil, armature winding and self inductance of the armature

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio C. Gonzalez whose telephone number is 571-272-2024. The examiner can normally be reached on M-F (8AM-5PM).
